

September News Bulletin

IPowerE trusts that this newsletter finds you doing well and in good health. Here is a brief update on what is going on at IPowerE right now.

Upcoming events:

- On 27 September we have our next one-day seminar which is being held as previously in Kegworth, UK. The focus of the seminar is 'Diverse Solutions for De-Carbonisation'
- Date to be announced is the Operational Report presentation giving members and contributors the opportunity to discuss the report findings.
- Dates to be announced shortly on a webinar series for 2023 through 2024 to engage members worldwide.
- News to be announced shortly on our Young Engineer (YE) group. New publicity information has been released and a call given for young engineers to get involved. We are keen to do all we can to encourage young engineers. We encourage members to consider nominating Young Engineers in their companies for membership. IPowerE members who have taken leadership roles in the organization reflect positively on their experience in joining the organization under the mentorship of senior colleagues early in their careers and the opportunities membership offered to expand their network and knowledge base.

Recent events:

- We were invited to join our friends in Cranfield university be represented and give a talk at the 2023 Thermal Power MSc end of course event on 7 September.
- We have supported and attended a webinar on 11 September organised by our Academic Partner in India the SRM Institute of Science and Technology when our President Ian Macafee gave an introductory talk. It was the Inaugural Programme for the IPowerE SRM Student Chapter. This included a lecture on Grid solutions and Energy Transition also a lecture on Nuclear Power. There were circa 180 attendees.
- Continuing with our 100 Year tradition of the original WCR in 1923 we have issued the August 2023 Operational Report providing the analysis of power generation operational data for conventional technologies, renewable power including Wind, Hydro, Solar and Energy Storage. This is a "must read" report!
- We have issued the September 2023 Power Engineer with latest industry reports, articles and technical papers. We urge members to download both these if you do not receive a hard copy

In the meanwhile:

We continue to reach out to all members and encourage new members to join worldwide. Efforts also continue to assist members by encouraging professional registration with an increasing number of members now actively pursuing registration through the UK Engineering Council. This is open to all members worldwide and is seen to benefit individual members and employers alike since professional qualifications give valued professional recognition.
